

Main Sail Batten Boards..

Side note:
this is most
likely
overboard...

Bolt and cap nut... Wanted to make sure no sharp edges.

In Florida I was have Batten tension issues,
hence this modification

I still plan to put one of the Bram bolt and nuts on
the end of the batten

8 hours of sailing over the weekend... was hoping to get a bit more...

For some reason it is not easy to sail back with a 2' tiller extension...

Great weekend of sailing here...
